

WardRound Cart

Our largest workspace for sit or stand mobile working

Large workspace

The WardRound cart features our largest workspace on a mobile workstation. It's designed so that hospital staff feel like they are working at a desk, but have the benefit of being on wheels for mobility.

The large workspace gives space for a keyboard, mouse and paper notes if needed. It's great for collaborative working, as multiple clinicians can stand or sit at the desk when working together.

Perfect for single, dual or ultra widescreen monitors

We understand that working practices have evolved, and many like to use multiple screens or even one large ultrawide screen at the point of care.

This cart offers multiple options to suit you. Sometimes it is used as a bed end station with the ultrawide curved screen option which is great for accessing digital charting records.

Sit or stand

Height adjustment means that users can sit or stand depending on how or where they are working. The wide worksurface ensures that this cart can be used as a mobile sit/stand desk on wheels.
