

# Gaming Kart

## Bringing home comforts to clinical spaces

This cart is lightweight, highly manoeuvrable and easy to position by the bedside. It can be height-adjusted, as well as having monitor tilt and swivel to suit different patient positions.

For more information on the cart or to request a demo, please get in touch with our sales team, who will be happy to help. Our contact details are below.

## Features

Working with Get Well Gamers and play-specialists in hospitals, we've developed a fully kitted console cart for portability, security, and safety within medical settings. Our Gaming Kart can house any console and features a monitor and secure storage for the console, games, and accessories.

The hospital has the choice whether to purchase an empty cart to house any existing consoles you may have (or can acquire through donations) or you can choose between different Playstation or Xbox models, both with two controllers.

## Benefits

- The Gaming Kart offers instant inpatient entertainment. It can be fully configured so that it's simply ready to wheel onto a ward/private room.
- Interactive distraction through the form of gaming is a proven and effective pain management tool—which is why our Gaming Karts have become a popular solution.
- The use of Gaming Karts can help increase socialisation between patients and other patients, as well as with staff and visitors.
- This cart is easy to clean as it was designed for medical use.
- Cables are neatly tucked away so they don't look cluttered when in use.
- The drawer is often used to keep accessories in, such as controllers and games—and it can be locked when not in use.
- Comprehensive 5-year cart warranty.

## Areas of use

- Children's wards
- General wards
- Private rooms
- Nursing homes

## Compatible with

- ✓ Playstation
- ✓ Xbox
- ✓ Nintendo Switch
